

THE ULTIMATE DISINFECTING AND SANITIZING CABINET IDEAL FOR CHILDCARE AND EDUCATIONAL FACILITIES

The ZONO system uses ozone to safely kill 99.99% of common viruses+ like Norovirus (disinfecting level) and 99.9% of common bacteria* like Staph and E. Coli (sanitizing level). One of nature's most powerful oxidizers, ozone has been used as an organic disinfectant and sanitizer since the early 1900s.

The ZONO system focuses on a balance of science and innovation to solve the real world challenge of controlling germs. The ZONO replaces labor intensive spraying and wiping, and ensures that items are properly disinfected and sanitized. "ZONO" everything from toys and electronics to mats, crib mattresses and more.

The ZONO system is eco-friendly. It uses green technology that creates no harmful waste or discharge.

Wherever disinfection and sanitization is needed, ZONO delivers.

+Norovirus on non-porous surfaces. *Staphylococcus aureus, Methicillin-Resistant Staphylococcus aureus, Escherichia Coli, Streptococcus Pyogenes, Shigella dysenteriae, Salmonella Enteritidis, and Pseudomonas Aeruginosa on non-porous, semi-porous and porous surfaces.

Simple. Safe. Sustainable.

Meet the ZONO Sanitizing Cabinet, a revolutionary new disinfecting and sanitizing system safe for plastic, metal, fabric, and more.

What is the ZONO? The ZONO is a “green” system based on technology used in the medical and food processing industries. Using humidity and ozone, the ZONO disinfects and sanitizes items in 30 minutes. Ozone monitoring sensors located inside and outside the cabinet ensure that the ZONO is operating safely. The ZONO does not expose the user to chemicals.

What does the ZONO do? The ZONO kills 99.99% of common viruses+ (disinfecting level) and 99.9% of common bacteria* (sanitizing level). It is an important part of a comprehensive disinfecting and sanitizing routine. The eco-friendly technology reduces the time, energy, and chemicals required to disinfect and sanitize.

What can be placed in the ZONO? Just about EVERYTHING! “ZONO” all plastic toys, LEGO bricks, dolls, wooden blocks, cards, puzzles, hats, paper, plastic and cloth books, crib mattresses, mats, rugs, and more.

Is the ZONO like a washing machine or dishwasher? No, the ZONO uses humidity and ozone. Items do not get wet. Items come out undamaged, ready for immediate use and don’t require wiping or rinsing. The ZONO does not remove dirt.

The ZONO made an immediate impact at our center. There isn't a tour that occurs without mention and discussion around the ZONO, it truly sets us apart from our competition. We now have the ability to sanitize items that our competitors don't.

Owner, Childrens Lighthouse - Two Creeks, San Antonio, TX

Easy to use

Staff will simply load items and materials onto the ZONO carts, then roll the carts into the ZONO cabinet. To begin disinfecting and sanitizing, staff will lock the cabinet and enter the start code. Thirty minutes later, the items are ready for immediate use.

Safely disinfect and sanitize any surface in 30 minutes!

●
No staff attention
required during cycle

●
Integrated Mobile Cart
System ensures optimal
work flow for staff

●
No wiping or rinsing of
items

●
Does not damage or
discolor items

●
Eliminates odors

●
Lice and bedbug killing
heat option

●
Eco-Friendly

"Our managing director made an investment in a Zono machine because of her commitment to the health and safety of the students in the school, and it has paid off in dividends! We have seen a reduction in both the amount of illness at the school, as well as the spread of an illness."

Lynn Fichtel, School Principal of KLA Schools of Plainfield, IL

Simple. Safe. Sustainable.
